#### Description

A range of fluorescent luminaires suitable for commercial, industrial or domestic use. The batten may be surface mounted, conduit or chain suspended.

The slimline body is made from durable steel which gives improved rigidity. The fitting has high impact resistant moulded lamp holder end cap assemblies and replacement lampholders are also available. The battens have twist lock fasteners to allow opening and closing of the cover for installation and maintenance without the use of any tools.

The luminaire is epoxy polyester powder coated in white gloss. The end caps are UV stabilised non discolouring and are high impact resistant.

A range of reflectors, wire guards and round or square diffusers are available for this product. All switchstart luminaires are supplied with a power correction capacitor as standard.

#### PRODUCTS AVAILABLE

Catalogue No.	Description
<b>PFT 118</b>	18W 2ft/600mm single batten
<b>PFT 136</b>	36W 4ft/1200mm single batten

## Applications

The PREFECT BATTEN range of luminaires is suitable for ceiling mounting in many local authority and commercial applications.

- Store rooms
- Amenity areas
- Corridors
- Manufacturing areas
- Private access areas

## Maintenance

For best results do not use abrasives or highly alkaline cleaners on the fittings. Do not use squeegees, razor blades or other sharp instruments. Do not clean the diffuser in hot sun or elevated temperatures.

- To remove labels, stickers etc., from the fitting or lamp the use of kerosene, naphtha or white spirit is generally effective.

Generally speaking, a re-lamping and cleaning programme every 12 to 36 months is advisable depending on hours of use.

## Standards

All luminaires in the PREFECT BATTEN range are designed and manufactured in accordance with the relevant sections of BS EN 60598. In addition, they comply with the requirements of European Directive 89/336/EEC and carry the CE mark. Each and every fitting undergoes stringent testing in excess of that required under the standard, to ensure that any possibility of luminaires arriving on site in anything other than full working order is kept to an absolute minimum.

## Technical Advice

Our Technical Department would be pleased to advise customers with regard to any technical aspect of Vandalite luminaires. This includes a design service using state-of-the-art computer software, or manual calculations to ensure that each project receives the correct attention for the job.
